PRATIK JAYDEEP KHETMALIS

+91-7387848095 | khetmalisp3@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Analyst with strong expertise in machine learning and data-driven decision-making. Experienced in building end-to-end projects involving customer analytics and AI-based automation systems. Skilled in Python, SQL, and data visualization, with hands-on experience in predictive modeling, NLP, and deploying scalable solutions.

TECHNICAL SKILLS

Languages: Python, SQL
Libraries: Pandas, NumPy, Scikit-learn, XGBoost
Data Analysis: EDA, Data Cleaning, Feature Engineering
Visualization: Matplotlib, Seaborn
Backend: Flask, REST APIs
Tools: GitHub, VS Code, Google Colab

EXPERIENCE

Tech Mahindra – Associate Software Engineer (Data Analytics) Mar 2024 – Mar 2026 | Pune, India

- Analyzed customer behavior and transactional data for 10K+ records to identify trends impacting pricing strategies.
- Wrote complex SQL queries (joins, aggregations, subqueries) to extract, clean, and transform large datasets from relational databases.
- Performed exploratory data analysis (EDA) using Python (Pandas, NumPy) to uncover patterns and key insights.
- Enhanced automated data processing and reporting scripts using Python, reducing manual effort by ~30%.
- Collaborated with stakeholders to transform data into meaningful insights for decision-making.

Prodigy Infotech – Machine Learning Intern (Remote) Oct 2023 – Nov 2023

- Collected and cleaned datasets by handling missing values and preparing data for ML models.
- Implemented and optimized machine learning algorithms to improve performance.
- Developed and deployed models using Python and Scikit-learn.
- Documented workflows and improved data pipelines for better efficiency.

PROJECTS

Customer Churn Prediction System – ML Project

- Built and compared multiple ML models (Logistic Regression, Random Forest, XGBoost) achieving ~85% accuracy and evaluated using ROC-AUC and confusion matrix.
- Performed SQL-based exploratory analysis to identify key churn drivers such as contract type, tenure, and monthly charges.
- Conducted data cleaning, feature engineering, and preprocessing including handling missing values and encoding categorical variables.

- Developed and deployed an interactive Streamlit web application for real-time churn prediction with probability scoring.
- Ensured feature consistency between training and inference by saving and aligning feature columns for production-level predictions.
- Generated actionable insights to support customer retention strategies and business decision-making.

AI Resume Analyzer – (NLP-Based System)

- Designed an NLP-based system using TF-IDF and cosine similarity to match resumes with job descriptions.
- Extracted key information (skills, education, experience) and developed a candidate ranking system.
- Created Flask APIs for real-time resume analysis, simulating an ATS system.
- Performed text preprocessing (tokenization, stopword removal) to improve matching accuracy.
- Structured input/output data formats to handle multiple resumes efficiently.

EDUCATION

International Institute Of Information Technology, Pune **July 2023**
Bachelor of Computer Engineering **CGPA: 8.2/10**

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified: Azure AI Engineer Associate (AI-102)
- IBM watsonx Essentials
